Laboratory Equipment

This is a laboratory course which requires the student to undertake a number of drawings and dissections of preserved animals. Therefore, it will necessary for the student to obtain a number of items essential for success in Zoology 5.

1. **Dissection kit.** The laboratory provides used scissors, probes, forceps and scalpels. New dissection kits are available in the SMC Student Store. Check with your instructor for more details. Each student should provide their *own* gloves. These are available from Home Depot or 99 cent stores at a nominal price. Make sure to obtain gloves that fit comfortably.

2. **Biology / Botany Paper.** This heavy duty paper is *required* for drawings and is usually available in the SMC Student Store.

3. **Pencils.** 2H required in your lab section. Colored pencils are very useful.

4. **Pen and Ink.** Suggested by some instructors. A useful technical drawing pen is the Staedtler Marsmatic 700 technical pen “0.35mm (0)” point. Also, the ink needed is Koh-I Noor rapidograph waterproof Black India Ink. See your instructor.

5. **Laboratory Coats.** Optional.
