Math 54 – Project Sample Plan

Group Members:

1) Target Population:

2) Main Question – this must have a specific numeric response at the ratio level.

3) Sampling Method – Explain exactly how your sample will be gathered, be specific. Also note any limitations or biases you see with your method.
4) If the group plans to ask any additional questions, please list them here.

5) Why did your group choose this target population? Why did you choose the proposed questions? What do you think you will find in the final results?

6) If you are planning to use a questionnaire that the subjects will complete, attach a copy of the questionnaire to this form.
