Santa Monica College

Student Learning Outcomes

Date: August 23, 2006

Course Name and Number: Advance Human Anatomy – Anatomy 2

Student Learning Outcome(s):

1. Exhibit a unified three dimensional perspective of the entire human body and demonstrate the ability to integrate and correlate all previously learned knowledge from Anatomy 1.

2. Exhibit oral and written communication competency through case studies, projects, and lab presentations

3. Formulate well-written essays that clearly communicate the critical thinking process in a systematic, prioritized and analytical approach when a certain clinical condition is discussed.
