Plaque-Away Lab:

I. Title: use keywords
II. Abstract: very short, everything you found
III. Introduction: background information
IV. Materials and Methods: past tense; specific; (like a cooking recipe)
V. Results: just the data, no opinions, raw data plus tables plus graphs (line graph vs. bar graph)
VI. Discussion: explain the data
VII. Conclusions: keep it brief
VIII. Literature cited: the bibliography, can be textbooks or articles, any source of info

The following are examples of a ‘bar-graph’ and a ‘line-graph’:
